VAISHNAVI INDUSTRIES

PERMANENT PAINTS | SUPPLY & APPLY

COMMERCIAL COMPARISON

LOOK BEYOND THE FIRST COAT

How multi-layer painting, decorative stucco and PERMANENT™ PAINTS finishing differ.

- **Traditional paint**

  Often uses multiple separate layers. Failures may involve peeling, fading or patchy repairs when dampness or preparation becomes a problem.

- **Decorative stucco**

  Attractive decorative methods, usually dependent on specialist application, suitable bases and compatible finishing products.

- **PERMANENT™ PAINTS**

  PRO GLOSSY interior and PRO SMOOTH exterior products delivered as complete Supply & Apply services on prepared plaster.

- **Why this matters**

  A company-managed workflow can reduce hand-off confusion. It does not eliminate the need for good plaster or moisture treatment.

REAL PHOTOS OF EXISTING WALL DAMAGE

Peeling at an exterior corner

Older wall coating damage

Separation near floor level

Plaster exposed after coating loss

These photos show specific walls with coating damage. Their installation dates and causes have not been verified. Not all conventional paints fail within any particular number of years, and no finishing system can promise zero failure.
